Table 66: Percentage of middle school students who played on at least one sports team run by their school or community groups during the 12 months before the survey	67
Table 67: Percentage of middle school students who had a concussion from playing a sport or being physically active during the 12 months before the survey	68
Table 68: Percentage of middle school students who had 9 or more hours of sleep on an average school night	69

INTRODUCTION

Priority health risk behaviors (i.e. preventable behaviors that contribute to the leading causes of morbidity and mortality) are often established during childhood and adolescence and extend into adulthood. Ongoing surveillance of youth risk behaviors is critical for the design, implementation, and evaluation of public health interventions to improve adolescent health. The Youth Risk Behavior Survey (YRBS) is a national surveillance system that was established in 1991 by the Centers for Disease Control and Prevention (CDC) to monitor the prevalence of health risk behaviors among youth. YRBS data are routinely collected on high school students, but only a few states collect data in middle schools. The Nevada Middle School YRBS is biennial, anonymous and voluntary survey of students in 6th through 8th grade in regular public, charter, and alternative schools. Students self-report their behaviors in five major areas of health that directly lead to morbidity and mortality, these include:

- 1) Behaviors that contribute to unintentional injuries and violence;
- 2) Tobacco use;
- 3) Alcohol and other drug use;
- 4) Unhealthy dietary behaviors; and
- 5) Physical inactivity.

In 2017, 32 middle schools were randomly chosen by the CDC to represent Nevada. To ensure greater representation from schools in *all* districts, the Nevada Division of Public and Behavioral Health contracted with the University of Nevada, Reno, School of Community Health Sciences to conduct the YRBS in all middle schools throughout the state. The 2017 Nevada Middle School YRBS provides statewide data to assess priority health-risk behaviors among middle school students; measure progress toward achieving national health objectives for *Healthy People 2020* and other program and policy indicators; and evaluate the impact of school and community interventions at the national, state, and local level. It is our intention that these data will be used by education and health professionals, policy makers, community members, and researchers to improve the health of Nevada's middle school students.

METHODS

Sampling, Weighting, and Analysis

The 2017 Nevada YRBS sampling plan was designed to ensure that every eligible student had an equal chance of selection. A two-stage (region and classroom) random cluster sampling design was used to produce a representative sample of students in grades 6-8 (all Nevada regular public, charter, and alternative middle schools). In order to provide regional data that represent all counties in the state, the first sampling stage grouped all 17 school districts into 8 regions that generally reflect the prevention coalition structure (Table 1). The regional grouping also helped ensure that individual schools could not be identified. In the second sampling stage, classes were selected within schools with the probability based on a required margin of error in the sample size for each region. Intact classes of either all second period or all required English

courses were randomly selected from each school. The questionnaire was administered to all students in sampled classes from February to May, 2017.

The 2017 Nevada YRBS data were weighted based on the sex, race/ethnicity, and grade level of students in each region. The weighting process ensured that the estimates accurately represent the entire student population in each region and the state as a whole. Non-response or poor sampling procedures can result in a sample that is not a representative subset of the population; therefore un-weighted results from these samples may not accurately reflect student behaviors and could be misleading. This report only displays weighted results.

Table 1: 2017 YRBS sampling regions and prevention coalition structure

Region	School District	# Schools	Nevada Statewide Coalition Partnership
1	Carson City	2	Partnership Carson City
2	Douglas County	2	Partnership of Community Resources

5	Lyon County Mineral County Storey County	7	Healthy Communities Coalition
6	Esmeralda County Nye County Lincoln County	10	Nye Communities Coalition
7	Washoe County	16	Join Together Northern Nevada
8	Clark County	62	Care Coalition PACT Coalition Nevada Community Prevention Coalition

Permission Status and Response Rates

Parental permission is required for YRBS participation. Nevada school districts have two types of parental permission: 1) active and 2) passive. *Active parental permission* means the students must return a signed permission form indicating their parent or guardian’s approval for participation in the survey. *Passive parental permission* means the students take a permission form home and return it only if their parent or guardian does not want them to participate in the survey. The type of permission status varies by district based on school district policy. Active permission requires more time and resources and may reduce the number of students that participate in the survey. All school districts agreed to participate in the 2017 Middle School YRBS and only 7 schools did not participate (182 potential respondents). Overall, 5,464 youth from 113 schools completed the survey. Overall response rates (a combination of school and student participation) were generally higher in the school districts with passive parental permission (Table 2 and Figure 1).

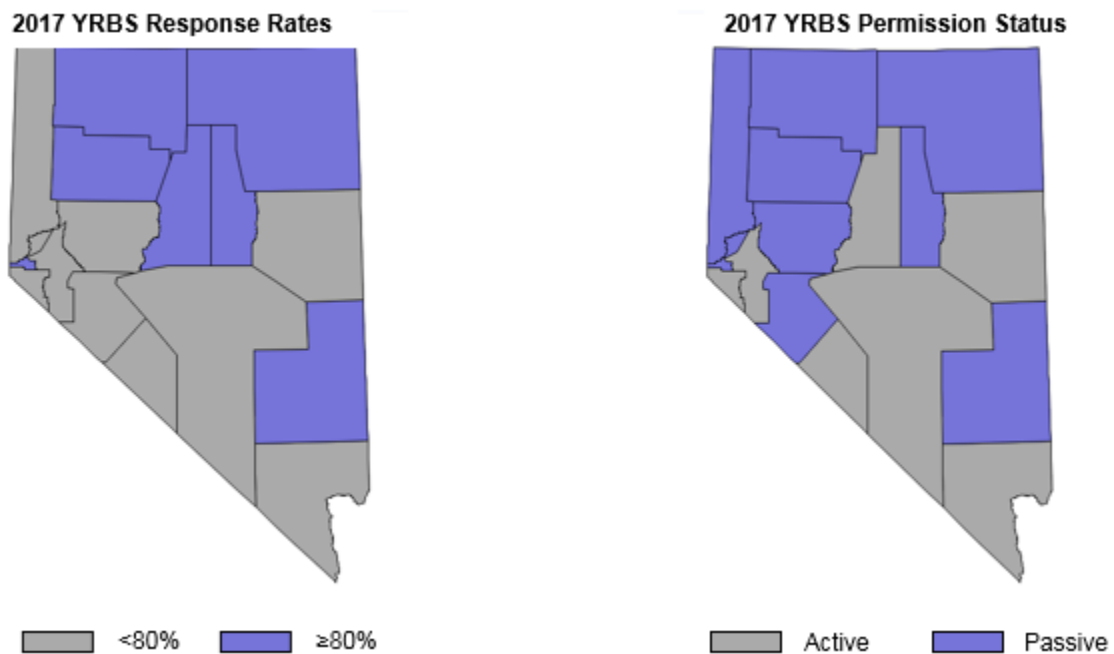

Table 2: 2017 YRBS response rates by school district

District	2015 YRBS Response Rate	2017 YRBS Response Rate	Permission
Carson City School District	93.2%	93.2%	Passive
Churchill County School District	90.7%	75.1%	Passive
Clark County School District	62.4%	60.7%	Active
Douglas County School District	29.5%	47.1%	Active
Elko County School District	83.8%	84.8%	Passive
Esmeralda County School District	33.3%	33.3%	Active
Eureka County School District	77.8%	91.3%	Passive
Humboldt County School District	93.4%	88.9%	Passive
Lander County School District	87.8%	87.6%	Active
Lincoln County School District	82.1%	93.8%	Passive
Lyon County School District	53.1%	69.5%	Active
Mineral County School District	100.0%	42.9%	Active*
Nye County School District	55.5%	57.2%	Active
Pershing County School District	100.0%	92.5%	Passive
Storey County School District	87.0%	77.3%	Passive**
Washoe County School District	80.1%	73.0%	Passive
White Pine County School District	90.0%	72.6%	Active
Overall Response Rate	69.5%	65.8%	

* In 2017, Mineral County changed to passive permission but survey administration still followed active permission

**In 2017, Storey County changed their permission requirements from active to passive
